

SAINATH LINGAMPALLI

Data Science & Machine Learning Engineer

sailingampalli1601@gmail.com | 8329005016 | LinkedIn: [Sainath Lingampalli](#) | GitHub: [Sainath Lingampalli](#)

OBJECTIVE

Aspiring Data Science and Machine Learning Engineer with a strong foundation in Python, SQL, and data analytics. Skilled in data preprocessing, predictive modeling, and applying supervised and unsupervised learning techniques to solve real-world problems. Seeking an opportunity to contribute to data-driven decision-making and develop scalable AI solutions.

EDUCATION

Bachelor of Technology in Information Technology

MGM's College of Engineering, Nanded (2021 – 2025)

Bahirji Smarak Mahavidyalaya, Basmath (2020 – 2021)

Class 12th – 87%

TECHNICAL SKILLS

- Programming: Python, SQL
- Data Analysis: Pandas, NumPy, Excel, Data Cleaning, EDA, Feature Engineering
- Machine Learning: Scikit-Learn, TensorFlow, Regression, Classification, Clustering, Model Evaluation
- Visualization: Power BI, Tableau, Matplotlib, Seaborn
- Databases & Tools: MySQL, SQLite, Git, Jupyter Notebook, VS Code
- Concepts: Statistical Analysis, Predictive Modeling, ETL Basics, Data Modeling

WORK EXPERIENCE

Intern | EduNet Foundation – AICTE

Project: Fitness Tracking System | Duration: 1 Months

- Developed a fitness tracking system using **AI to monitor users'** physical activities and health metrics.
- Implemented data analytics to provide personalized insights and performance tracking.
- Integrated **real-time monitoring** features for step counting, calorie tracking, and workout analysis.
- Utilized Python, and data visualization tools for predictive analysis.

Smart Agriculture System

- Developed an ML-based crop recommendation system using **Python** and **Flask**.
- Developed ML-based crop recommendation system achieving 87% prediction accuracy using supervised learning algorithms.
- Designed backend using **Flask** and **SQLite** for efficient data management.
- Built responsive frontend using **HTML**, **CSS**, and **JavaScript**.
- Deployed application for real-time accessibility.
- GitHub: <https://github.com/Sainath160103/final-year-project>
- Live Demo: <https://final-year-project-vb6n.onrender.com/>

Interactive Virtual Herbal Garden

- Developed an interactive web-based platform showcasing medicinal plant data.
- Structured plant dataset and implemented information retrieval features.
- Integrated user feedback functionality to improve engagement.
- GitHub: https://github.com/Sainath160103/AYUSH_Virtual_Garden

CERTIFICATION

- Introduction to Generative AI – Google Cloud
- Data Analyst 101 – Microsoft
- Python Fundamentals & Introduction to AI – Infosys Springboard
